All the production lines are installed with modern machines and tools to cater the needs as feed ingredients of poultry , livestock , pets etc..

To broaden our experience we turned to exporting our products worldwide ,Using total quality management techniques ,and systematic full logistics operation from screening ,grinding , classifying , processing ,tailored packaging and finally safe transportation .

Production

Calcium Carbonate Production chart

Our Quarry of limestone is from the purest area in Egypt & worldwide .Our Production line of Calcium Carbonate is crushed and grinded then screened to 4 sizes serving different customer requirements .

Poultry meal Production chart

Our Production Line is concerned with the production of protein powder from the waste of poultry slaughterhouse. These wastes are the intestines, head, legs, feathers. They are treated so that complete sterilization can be done under internal pressure conditions of up to 3 bars and temperatures up to 150 ° C.

These conditions break down the complex undigested protein compounds and convert them into a digested protein. The drying process is then carried out to extract

We are one of the key Producers Exporters, Service Providers, Suppliers and Traders of Poultry meal ,Soy bean , corn gluten meals & Calcium Carbonate.
